=====

The Alchemical Symbol for
Earth is scribed onto the
first page of this heavy
tome.

=====

These beings embody the
element of Earth, and as
the Air Elementals dwell
naturally on a plane
devoid of solidity, the
Earth Elementals are
native to a world devoid
of air. They are mighty
engines of destruction
indeed, possessing both
the crushing power of
the avalanche and the
steadfast endurance of
the mountain.
Furthermore, they
command magicks allowing
them to twist the earth
to their will.
